

GENUINE PRODUCTS

24SI™ Heavy Duty Alternator

FEATURES & BENEFITS

- **Dual internal fan (DIF)** design provides maximum cooling technology
- **OE approved**, assuring OE quality, reliability and performance for aftermarket replacements
- **Superior output** producing 160 Amps at road speed and 100 Amps at idle
- **Lightweight and compact** in size provides simplified installation
- **Warranty:** 1 year/unlimited miles (Applicable to U.S. and Canada only)

Maximum Cooling Technology specially designed for today's higher under-hood temperatures

The 24SI has a dual internal fan (DIF) design that provides Maximum Cooling Technology. Dual fans mean greater air circulation over the alternator electronics. That allows the alternator to run at lower temperatures which improves the operating efficiency and durability of the unit.

With a single external fan, air is drawn in from the terminal end and passes through the length of the alternator to exit through the fan. The higher operating temperature reduces the unit's efficiency and durability.
